IT Project Coordinator

Management • Optimisations • Product-minded PM

ABOUT ME:

I combine experience as a Project Coordinator with a technical background as a Front-end Developer, which allows me to effectively translate business goals into technical team actions.

I am able to improve processes, coordinate projects, and communicate efficiently with both business stakeholders and developers, resulting in smoother project delivery and better team collaboration.

I focus on delivering real business value and effective project execution.

EWSB POZNAN 09.2014 – 06.2017

Field of study: Management

EXPERIENCE:

RTB House – Project Coordinator

05.2024 – present

Responsibility for coordinating projects in an Agile environment (Scrum and Kanban), managing information flow, and facilitating collaboration between teams and stakeholders to ensure timely delivery and high-quality outcomes. Supporting sprint planning, prioritization, and tracking task execution in line with business requirements.

- Organizing information flow, monitoring project status and deadlines, and identifying and escalating blockers.
- Coordinating teams working in Scrum and Kanban methodologies using project management tools.
- Supporting the delivery of marketing and operational projects by ensuring smooth cross-department collaboration.
- Maintaining consistency in processes, documentation, and communication within a dynamic Agile environment.
- Collaborating on process optimization and improving day-to-day coordination activities.

HUNCWOT – Front end Developer

03.2021 – 05.2024

Development of modern, responsive web applications, collaboration with designers on implementing interfaces, optimization of development processes, and implementation of animations and component-based solutions.

- Collaboration with designers and the technical team to deliver functional and visually appealing web solutions.
- Responsibility for delivering front-end projects with a focus on timeliness, quality, and alignment with requirements.
- Optimizing the process of building and deploying projects to improve team efficiency.
- Implementing responsive and modern interfaces with attention to user experience.

SEMCORE – SEO Specialist

11.2019 – 03.2021

Support of SEO activities through content optimization, performance analysis, and collaboration with the team on implementing changes that improve website visibility in search engines.

- Coordination of SEO efforts between content, technical, and marketing teams.
- Participation in prioritization planning and implementation of changes affecting website visibility and performance.
- Monitoring results and reporting the outcomes of optimization activities.
- Collaborating on creating and improving content in line with SEO guidelines.
- Supporting processes related to increasing brand visibility in organic channels.

Bithomp – React developer / Part time

06.2019 – 04.2020

- Development and maintenance of a web application in React, with a strong focus on code quality and application stability.
- Collaboration with a startup team on implementing new features and improving the product.
- Building UI components and implementing responsive, intuitive interfaces.
- Participation in requirements analysis, code reviews, and ongoing resolution of technical issues.
